

Kamantou

The Hidden City

Buried deep in the darkest parts of the northern forests, where the misty jungle kisses the outer tentacles of the Great Barrier Mountains, there lays the legendary city of Kamantou.

A people called the Kamanturi, exiled from the Central Empire, ventured here long ago. Their knowledge of construction and the Arcane allowed them to build a splendid city in this forsaken place.

It is said they still live there, albeit unwilling to excrete from the Empire.
